

HUSQVARNA INTRODUCES THE NEW K 770 POWER CUTTER:

PROGRESSIVE BY NATURE. PROVEN BY HERITAGE.

Heavy-duty cutting, impressively durable design, easy starts and comfortable handling – all in one easy-to-handle package, guaranteeing efficiency and increased performance. With the new K 770 power cutter, Husqvarna takes yet another step towards the perfect cut.

How can you improve on perfection? How can you make a product that's cherished and appreciated all around the world even more iconic?

The answer, after all, is fairly easy. You just make it even better. More powerful, easier to handle and even more sturdy and durable. In this case, the task at hand was based on half a century's worth of experience, proven technology and technical expertise. It was, after all, Partner's Evald Carlsson who, in 1958, invented the very first power cutter by modifying his chainsaw by replacing the chain with a cutting disc and a drive belt.

A TRUE SUCCESS STORY

The rest, as they say, is history. And a fairly auspicious one at that. The evolution of the Husqvarna power cutter range has been met with approval from professionals all around the world. Professionals who appreciate equipment that delivers power and performance and a truly user-centric approach to designing heavy-duty machines.

ONWARDS AND UPWARDS

And now, true to our heritage and tradition, the time has come to present yet another landmark in power cutting – the K 770. Progress and heritage – hand in hand – in one

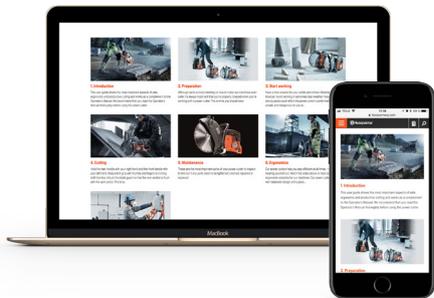

hard-to-beat package of operational perfection. Fit the blade. Fill the tank. Prime, choke and pull the cord. That's all it takes. And then it's all about enjoying the power of the 74cc engine, the massive torque, the 125 mm cutting depth and the efficiency of your choice of blade.

The spring-loaded, semi-automatic SmartTension™ system ensures that the drive belt is always kept at the optimised tension.

BUILT TO PERFORM

When it comes to productivity, Husqvarna K 770 plays in its own league thanks to the high power-to-weight ratio. The well-thought design increases the exactness and the force of the cut, while the low weight and the vibration-damped handles ensure comfortable handling during long, productive work shifts. The spring-loaded, semi-automatic SmartTension™ technology, makes it easy to ensure that the drive belt is always kept in the correct tension, thereby ensuring optimal power transmission as well as minimal tear and maximum life of the belt. And thanks to the new heavy-duty cutting arm with three-bolt joint, longevity and durability is guaranteed in all conditions.

FOR EVEN SAFER HANDLING

Safety and ergonomics have been at the core of our design philosophy ever since the beginning. So, in order to provide Husqvarna users with the best and most efficient cutting experience, we've designed the comprehensive Power Cutter User Guide, a digital hub containing instructional

videos, know-how and educational material that will help both experienced as well as first time users.

COMMITTED TO OUR CUSTOMERS' SUCCESS

Husqvarna is thoroughly committed to our customers, and to the demands of their particular workday. In everything we do, we focus on simplifying their workload, making it easier, faster and safer to get the job done. With this ambition firmly in focus, we're now proud to be able to present our latest addition to cutting perfection – the K 770.

TECHNICAL SPECIFICATION

| | |
|-----------------------|-----------------------|
| Displacement | 74 cm ³ |
| Engine power | 3.7 kW |
| Blade diameter | 300 / 350 mm |
| Dry weight excl blade | 9.9 / 10.1 kg |
| Max. cutting depth | 100 / 125 mm |
| Vibrations | <2.5 m/s ² |

HUSQVARNA CONSTRUCTION PRODUCTS, part of Husqvarna Group, is a market leader in machines and diamond tools for the construction and stone industries. The product range includes power cutters, drill motors and drill stands, diamond tools, floor, masonry, wall and wire saws, as well as surface preparation and demolition machines. Net sales 2016 amounted to 4.1 billion SEK. Husqvarna Construction Products has 2,100 employees, 11 major factories around the world and is represented in more than 70 countries. Husqvarna is a registered trademark owned by Husqvarna AB (publ).
