

New: GARDENA Electric Trimmer EasyCut 400/25
GARDENA Electric Trimmer ComfortCut 450/25
GARDENA Electric Trimmer ComfortCut Plus 500/27
GARDENA Electric Trimmer PowerCut 650/30

Always at the ready for clear edges

Most garden owners want to simply enjoy their garden as an oasis of well-being. Necessary maintenance should therefore be quickly and easily mastered, cutting of the lawn edges or smaller tidying tasks on the plot should be effortless – the tool of choice: a grass trimmer.

After GARDENA most recently expanded its Trimmer range with two products with powerful lithium-ion batteries, the brand manufacturer has also updated its cable-based Electric Trimmer and introduces four new products: EasyCut, ComfortCut, ComfortCut Plus and PowerCut Plus. The most important features of all the new GARDENA Electric Trimmer are particularly easy operation, equipment settings can be made intuitively and they have so much power that they can take on hearty rank growth.

The top-of-the-range model is the new GARDENA Electric Trimmer PowerCut Plus 650/30 with a powerful 650 watt motor power and two millimetre cutting filament. In addition, the function "AutoSpeed" ensures an automatic adjustment of the trimmer speed on the grass to be cut. This brings the required extra to the power when cutting hearty grass or larger areas.

With the models ComfortCut, ComfortCut Plus and PowerCut Plus, the trimmer head which has an integrated guide wheel and can be swivelled sideways, eases the upright cutting of overhanging lawn edges. The working ergonomics are optimally used as the easily adjustable front handle as well as the handle adjustment with a foot pedal of height and angle can be individually adapted to the user. This makes trimming under garden furniture such as trampolines or garden benches but also under shrubs quite easy. Moreover, for the protection of flowers and tree trunks, an integrated plant guard can be folded out and – also quite important – filament extension is easily made with the press of a button.

The new GARDENA Electric Trimmer, depending on needs, is also in other performance classes: GARDENA EasyCut 400/25 (400 Watt), the GARDENA ComfortCut 450/25 (450 Watt) and the GARDENA ComfortCut Plus 500/27 (500 Watt). ■

Always at the ready for clear edges

GARDENA has updated its Electric Trimmer. Depending on the requirements, there are four new products in the range which are all particularly easy to operate. Thanks to the trimmer head which can be swivelled, the trimmers (except the EasyCut model) are also always at the ready for an upright cut of the lawn edges. And the top-of-the-range PowerCut Plus 650/30 (picture) in the highest performance class will gladly take on hearty rank growth. (Photo: GARDENA)
