GARDENA Classic Fine Spray Lance  
GARDENA Tap Connector  
GARDENA Hose Connector and Water Stop  
GARDENA Hose Repairer

## **Original GARDENA System – the new generation of a million times over proven classic**

**For over 45 years, the Original GARDENA System has stood for easy watering in the garden. One click – and the connection from the water tap to the hose and the watering accessory is absolutely tight. GARDENA has now revised the core of its brand and significantly improved the already proven Original GARDENA System.**

The focus of the innovations was the application-oriented Classic Segment of GARDENA Cleaning Nozzle, Watering Sprayer and Spray Lances but also the Original System Parts – GARDENA Tap Connector, GARDENA Hose Connection and Water Stop as well as the GARDENA Hose Repairer. The European leader in mobile garden irrigation follows the target of making the Original GARDENA System even more durable and comfortable in the application, for example, the improved ergonomic, weather and frost proof and up to a 30 per cent increase in hose holding force as well as colour coding that lets you know exactly which parts belong together.

### **The Right System Tool for each Application**

There is the right tool for every application in the garden with the new GARDENA Classic Cleaning Nozzle, Watering Sprayer and Spray Lance. Distinctive innovations are 1. durable quality of the tool through frost proof, 2. an ergonomic trigger for the continuous flow of water and 3. the comfortable single-handed operation when regulating the amount of water. Furthermore, the Classic Multi-Sprayer can also create additional spray patterns. Then, the choice between soft spray, 9 point hard jet or bubble-jet spray makes the sprayer versatile. Soft components protect the spray head from any damages if it falls and also, cleaning is extremely easy. Dirt or lime scale can be easily removed from the soft nozzle and on the hose side, there is a removable dirt filter for easy care.

The GARDENA Classic Spray Lance ensures sufficient reach with its length of 75 centimetres for watering in large beds and in high or otherwise hard to reach places.

### **Optimal hold on the hose**

So that what optimally comes together stays together, GARDENA has also revised its System Parts and thereby once again improved the classic in garden irrigation. Additional soft components ensure increased hold with the hose connectors and water stops, even with wet hands or gloves. This also applies to the newly designed sleeve nut. Moreover, this ensures an even better connection between the hose and the coupling with a distinct increase in the holding power of 30 per cent – really useful when the hose is pulled around a corner. The GARDENA Tap Connector (available in sizes G1/2", G3/4", G1"), GARDENA Hose Connector and Water Stop (available in sizes 1/2" - 5/8" und 3/4") as well as the GARDENA Repairer (also available in sizes 1/2" - 5/8" und 3/4"), all not only look strong and durable but really are. An improved connection to the hose, optimal hold and comfortable handling means more value and at the same time, a stable price. ■

**Original GARDENA System – the new generation of a million times over proven classic**

GARDENA has now completely revised the core of its brand. The new generation of the Original GARDENA System offers an even better hold with the connection between hose and coupling and in many functions, an improved handling. This also applies to the Cleaning Nozzles, Watering Sprayers and Spray Lances in the new Classic Segment. The water quantity can be comfortably adapted with one hand and an ergonomic trigger with easy operating locking function regulates the continuous flow rate. (Photo: GARDENA)

## New products at a glance – a brief overview

### **GARDENA Cleaning Nozzle**

classic spray nozzle, ideal for cleaning and watering with a fine mist

- On/Off Function
- Frost protection
- Soft components
- Ergonomic handle
- Hard jet
- Fine mist

### **GARDENA Classic Cleaning Nozzle**

Spray Nozzle is ideal for comfortable cleaning and watering with a fine mist

- On/Off Function
- Frost protection
- Ergonomic handle
- Single hand water quantity regulation
- Trigger
- Lock
- Hard jet
- Fine mist

### **GARDENA Watering Sprayer**

for gentle watering of potted plants and areas of the garden

- On/Off Function
- Frost protection
- Soft components
- Ergonomic handle
- Soft spray

### **GARDENA Classic Watering Sprayer**

comfortable impulse trigger for gentle watering of potted plants and areas of the garden

- On/Off Function
- Frost protection
- Ergonomic handle
- Single hand water quantity regulation
- Trigger
- Lock
- Soft spray

## New products at a glance – a brief overview

### **GARDENA Classic Fine Spray Gun**

Fine Spray Gun, ideal for variable watering and cleaning tasks

- On/Off Function
- Frost protection
- Ergonomic handle
- Single-hand water quantity regulation
- Trigger
- Lock
- Soft spray
- 9 point hard jet
- Bubble-jet

### **GARDENA Classic Fine Spray Lance**

ideal for comfortable and gentle watering of plants over a large area

- On/Off Function
- Frost protection
- Ergonomic handle
- Single hand water quantity regulation
- Trigger
- Lock
- Soft spray
- Length 75 cm

### **GARDENA Tap Connector**

for the connection of the Original GARDENA System Parts to the tap

- Available in sizes G1/2", G3/4", G1"

### **GARDENA Hose Connector**

for connection to the hose lead

- comfortable fitting with optimal connection to the hose and ideal hold
- Available in sizes 1/2" - 5/8" and 3/4"

### **GARDENA Water Stop**

for a faster connection and tool change on the hose end

- comfortable fitting with optimal connection to the hose and ideal hold
- Available in sizes 1/2" - 5/8" and 3/4"

## New products at a glance – a brief overview

### **GARDENA Hose Repairer**

for a quick hose repair without tools

- comfortable fitting with optimal connection to the hose and ideal hold
- Available in sizes 1/2" - 5/8" and 3/4"
