- **Ventilation openings under sleeves**
- **Zipped pocket on left sleeve**
- **Cheek pockets optimised for mobile storage**
- **Zipped pocket on left sleeve**
- **Zipped pocket on left leg**
- **Hooks for lace attachment**
- **Ventilation zips on back of leg**

ANY APPLICATION, WE HAVE IT COVERED.

As a chainsaw user, you need to keep productive all day — and your clothes need to support that. Just like a professional athlete, you need to optimise your performance and maximise your results.

For the athletes of the forest, Husqvarna offers four lines of protective clothing.

It starts with the basic functionality of Classic and moves up to the high-end sophistication of Technical Extreme — our most agile and advanced forestry wear ever.

Each step up offers less weight, higher movability and smarter features. However, the protective performance is of the highest importance regardless of which product you choose.

The following pages will help you find the perfect clothing for your needs.
To the user, comfort is in large parts a feeling. It’s our job to find out exactly how that feeling is created, how it can be improved, and what type of comfort is needed in each case. The materials used in Husqvarna protective clothing have all been either developed or hand-picked by us, and then put through many tests in the lab and in the forest to make sure they meet our requirements.
Each job comes with different requirements. Our range of protective clothing takes into consideration every type of work. In fact, our extensive range of safety clothing offers the latest innovations in design and materials, which will provide you with the level of protection and comfort you need to get the job done.
CLASSIC

- Occasional use
- Regular fit

PRODUCT OVERVIEW

- Elasticated waistband
- Two back pockets, one on the sleeve, and a dedicated first-aid pocket
- Two front pockets
- Elastic drawstrings at the waist and at the lower bottom of the jacket
- Adjustable for perfect fit

KEY FEATURES

- Reinforced shoulders and elbows
- Two back pockets, one on the sleeve, and a dedicated first-aid pocket
- Two front pockets
- Elastic drawstrings at the waist and at the lower bottom of the jacket

ADJUST FOR PERFECT FIT

Functional, durable and perfect for part-time use. Regular fit, and available in a wide range of sizes, the Classic Forest jacket is crafted for maximum mobility without compromising safety. The arms and knees are pre-bent and have been tailored to offer maximum mobility without compromising safety. The saw protection pad is completely covered, so saw dust doesn’t compromise the performance of the fibre layers.

FUNCTIONAL

- Part-time use
- Regular fit

PRODUCT OVERVIEW

- Elasticated waistband
- Two back pockets, one on the sleeve, and a dedicated first-aid pocket
- Two front pockets
- Elastic drawstrings at the waist and at the lower bottom of the jacket
- Adjustable for perfect fit

KEY FEATURES

- Reinforced shoulders and elbows
- Two back pockets, one on the sleeve, and a dedicated first-aid pocket
- Two front pockets
- Elastic drawstrings at the waist and at the lower bottom of the jacket

ADJUST FOR PERFECT FIT

Smart, durable and perfect for full-time use. High-quality durability and ventilation features make your long working hours easier. The upper part of the jacket is reinforced with additional fibre layers. This improves safety, especially in situations where the available fibre layers are not enough. The saw protection pad is completely covered, so saw dust doesn’t compromise the performance of the fibre layers.

TECHNICAL

- Full-time use
- Technical fit

PRODUCT OVERVIEW

- Elasticated waistband
- Two back pockets, one on the sleeve, and a dedicated first-aid pocket
- Two front pockets
- Elastic drawstrings at the waist and at the lower bottom of the jacket
- Adjustable for perfect fit

KEY FEATURES

- Reinforced shoulders and elbows
- Two back pockets, one on the sleeve, and a dedicated first-aid pocket
- Two front pockets
- Elastic drawstrings at the waist and at the lower bottom of the jacket

ADJUST FOR PERFECT FIT

Task-optimised, tight fitting and thoughtfully designed for full-time use. High-quality durability and ventilation features make your long working hours easier. Ideal for applications including:

- Forestry
- Garden maintenance
- Agricultural
- Woodcutting

TECHNICAL EXTREME

- Professional use
- Technical fit

PRODUCT OVERVIEW

- Elasticated waistband
- Two back pockets, one on the sleeve, and a dedicated first-aid pocket
- Two front pockets
- Elastic drawstrings at the waist and at the lower bottom of the jacket
- Adjustable for perfect fit

KEY FEATURES

- Reinforced shoulders and elbows
- Two back pockets, one on the sleeve, and a dedicated first-aid pocket
- Two front pockets
- Elastic drawstrings at the waist and at the lower bottom of the jacket

ADJUST FOR PERFECT FIT

Style and performance taken to the extreme. Superior comfort by movability and thermal control, with your trousers on your knees all day. Ideal for applications including:

- Forestry
- Garden maintenance
- Agricultural
- Woodcutting

EXTRA FEATURES

- Micromesh Tech-Shell
- 4-way stretch fabric
- Stretchable fabric
- High ventilation
- Ventilated yoke, lower back of jacket
- Openings at the yoke and the lower back make for good ventilation
- Zips in the armpits and at the back of the legs

STRETCH FOR COMFORT

- Stretch for comfort
- Move freely
- Safe and comfortable in place all day
- Braces included
- Ankle strap allows you to put your trousers to your laces, to keep them tightly secured

- Chest pockets with a padded lining for your mobile phone
- POCKETS FOR YOUR MOBILE PHONE
- Two back pockets, one on the sleeve, and a dedicated first-aid pocket
- Two front pockets
- Elastic drawstrings at the waist and at the lower bottom of the jacket
- Adjustable for perfect fit
FIND YOUR SIZE.

Depending on which model you buy, the clothes will fit differently on your body. The Classic and Functional lines have a regular fit, Technical has a tight fit, and Technical Extreme has a slim fit. Check your body measurements against the guide below to find your right size. We recommend you to always try the garment on to ensure the best fit.

Note! All measurements are body measurements, except the inner leg, which is a garment measurement. If a base layer is to be worn under the garment, it should also be worn when measuring.

**Chest**: measured around the widest part of the chest.

**Height**: from top to toe.

**Waist**: measured around the waist.

**Inside leg**: measured from crotch to desired length.

---

1 Available in Technical Waist Trousers.
2 Available in Technical Carpenter Trousers.

Technical Waist Trousers are available with longer legs, and Technical Carpenter Trousers are available with shorter legs. In general, Husqvarna carpenter trousers have a wider fit than the waist trousers.
Your protective clothes are regularly exposed to sweat and oil. These substances can reach the protection layer, reducing its function. This is why you need to wash your clothes regularly and in accordance with their labeling. If your clothes get heavily soiled, you should wash them as soon as possible after use.

**CLEAN CLOTHES ARE SAFE CLOTHES.**

In addition to washing and cleaning your protective wear, you also need to check for heavily worn areas, damages and tears in the fabric. The protective functions may be seriously reduced if repairs are not carried out properly. Use the guide below for reference, and always consult your dealer if in doubt.

**WASHING GUIDE**

- Wash the garment regularly in accordance with the instructions on the inside labeling.
- Machine wash. For temperature, see inside labeling.
- After washing, the garment should be stretched prior to drying. Air dry slowly.
- Do not wash your protective clothes inside out. Also, do not bleach, dry clean, or tumble dry. Iron with low heat.
- Clean the garment immediately if it has been subjected to petrol, oil, grease or other flammable materials. Fire hazard!
- Keep the garment away from sharp objects, acids, oils, solvents, fuels and animal droppings.

**REPAIR GUIDE**

- If a repair to the outer material is being made, do not sew into the protective material as this can reduce its protective qualities.
- Damaged outer material must be repaired immediately in order to prevent the protective material becoming damaged.
- The garment should be scrapped and not used again if the protective material has been damaged, incorrectly washed, or altered from its original shape.
- Adhesive must not be used when carrying out repairs as it may affect the protective material and reduce its protective qualities.
- This product is no substitute for the operation of a chainsaw and does not provide total protection.

Cut-retardant apparel and materials are subject to a certain degree of aging. In professional logging, the maximum period of usage is considered to be about 12 months. In non-professional or occasional use, up to 5 years is considered acceptable.
Felling trees is really just one part of a logger's everyday challenges. To get to your workplace, you often have to tackle any number of obstacles. You climb, you jump, you stretch and twist as you make your way through brushwood and water, over rocks and slopes.

That's where your protective wear needs to provide you with more than just safety. It needs to follow your every move. It needs to be as light as possible, adjust to the cold, the heat and your own body temperature.

And it needs to be comfortable, whatever you're doing — and wherever you're going.
