The GARDENA SILENO Robotic Lawnmowers are developed with the help of 20 years of experience, this ensures that your lawn care is as easy and effortless as possible. Reliable and fully automatic. In 2020 all models are also available as smart version to be easily and safely controlled with your fingertips via the GARDENA smart App.

Of course it’s a GARDENA.
Mowing with the mowing masters

**WOWWWW.**
It’s a better navigator.
Tackles the narrowest spaces and the tightest corners with reliable precision.

**PHEWWW.**
It’s All-Weather.
Come rain or shine, up or downhill. Where others struggle, SILENO gets the job done.

**SHHHHHH.**
It’s the quietest.
Best in class noise levels. You’ll hardly know it’s there.
GUIDING
Thanks to guide cables, it navigates reliably through all lawn areas, through narrow sections and back to the charging station via the shortest route. This means there is more energy left for mowing. The charging station can also be placed outside of the mowing area.

CORRIDOR CUT
Mowing even difficult or narrow passages from 60 cm is no problem for SILENO city and SILENO life thanks to the CorridorCut function. Due to a special mowing pattern the lawn is cut evenly.

CLEVER
With SpotCutting, a spiral mowing function ideal for hard-to-reach areas such as under trampolines or garden furniture.

CUSTOMISED
All models also have the SensorControl function: The intelligent cutting system automatically adjusts the mowing time based on grass growth.
EASY TO INSTALL
Installation is as easy as ABC and can be completed quickly, but what if you simply don’t have the time to do it? All information about our installation service can be found on page 16 or online:

Installation films
www.gardena.com/robotic-installation

SPOTLESS THANKS TO THE SENSOR CUT SYSTEM
Perfect, stripe-free, close cut – because the polished precision blades on both sides cut grass evenly and cleanly from all directions.

EXACT
Proven technology provides precise results: Thanks to the GARDENA boundary wire, the robotic lawnmower definitively knows where to mow – down to the exact centimeter. The boundary wire and guide cables do not have to be buried and still grow in after a few weeks and will be invisible.

WORKS IN ALL WEATHERS
All while remaining totally efficient and reliable. No need for a rain sensor!
Your lawn loves the mix of sun and rain, because then it grows particularly fast and densely. How great that the SILENO robotic lawnmower can do its job in any weather: it cuts without clogging even in wet weather and thus ensures the optimum lawn length every day.

FROST SENSOR
As soon as the outside temperatures approach freezing, the schedule of the robotic lawnmower is suspended (SILENO city and SILENO life). This protects the lawn, as mowing damages the grass when it is frozen.

UNCOMPPLICATED
Simply clean the SILENO city/life using your garden hose. And you are ready to go!
SUSTAINABLE
With mulching function. Practical: The fine cut grass tips are a natural fertilizer and maintain the lawn right down to the root area.

FLEXIBLE
How much should be cut? The cutting height can be adjusted flexibly.

INDEPENDENT
Totally autonomous mowing and charging equals pure relaxation.

Our robotic lawnmowers

SILENO city
-S-< 250 m²
For small lawns.
Art. No. 15001 | Art. No. smart Model 19069
Art. No. 15002 | Art. No. smart Model 19066

SILENO life

**Which one is right for you?**

Discover the robotic lawnmower adviser at www.gardena.com/advisors
Support and service

How do you get a beautiful lawn and gain more time? With a robotic lawnmower. But which robotic lawnmower is the right one? What do I need to be aware of? Stay on the safe side with our service and warranty services.

Our service at a glance

Frequently asked questions
Do you have a lot of questions? Find the answers in our online Robotic Lawnmower Support Centre.

Planning service
The right robotic lawnmower for any garden
We advise on the selection and help with the planning. Online advice can be found in the Robotic Lawnmower Support Centre or with our Robotic Lawnmower Service.

Extended warranty/Service packages
Carefree mowing
With the GARDENA extended warranty you are fully covered, and you can choose from various service packages to find the one that suits you best.

Installation service
Install and let it mow
It is easy to install a GARDENA robotic lawnmower. If you don’t have time to do it yourself, let a professional do the job for a flat fee.

Installation films
Here’s how
Our installation films give you step-by-step instructions on how it’s done.

Instruction manuals
Know more
Has the instruction manual disappeared? If you need more information, get answers to your questions in the Robotic Lawnmower Support Centre.

Inspection service
Check-up for your robotic lawnmower
The Comfort and Premium professional inspection services, including winter storage, make sure that your robotic lawnmower is in full working order ready for spring.

Spring check
Get the robotic lawnmower ready for the new mowing season
Prepare the robotic lawnmower for the new season after its “winter sleep”: Discover a guide to the spring check here.

GARDENA smart system

GARDENA Robotic Lawnmowers are also available in smart versions, which are the ideal introduction to the forward-thinking GARDENA smart system that combines watering, lawn care and more – all in one intelligent system controlled by the GARDENA smart App.

Always keep an eye on your garden
Whether you have a robotic lawnmower, water control, soil moisture sensor or garden lighting, the GARDENA smart App gives you a complete overview. A single app for all aspects of garden care.

Fully automatic, needs-based watering
The GARDENA smart system not only features robotic lawnmowers to make sure your lawn is mowed to a high standard; a smart Water Control, combined with a smart Sensor, ensures needs-based, automatic watering. So plants are only watered when they really need it.

For more information and products visit www.gardena.com/smart

Never mow again! Fully automatic – perfectly manicured lawns and needs-based watering of plants
