READY WHEN YOU ARE

HUSQVARNA FLEET SERVICES™

HUSQVARNA FLEET SERVICES™

An easier way to keep track of your equipment.

CONNECT YOUR EQUIPMENT FOR A HASSLE-FREE WORKDAY

Save time and money by connecting your equipment to Husqvarna Fleet Services™. Easily keep track of what you have and where, and if anything needs to be serviced or replaced. Offering you a complete overview of your operations.

ATTACH A SENSOR TO ANY PIECE OF EQUIPMENT

To connect a piece of equipment, all you need to do is install a small sensor. You can add sensors to all sorts of equipment, even those from other manufacturers. And our Automower® robotic mowers have built-in connectivity, allowing them to be tracked and controlled in real time.

1

INVENTORY

What equipment do we have?

2

LOCATION

Where did we last have it?

3

USAGE

Does it need to be serviced or replaced?

4

AUTOMOWER® CONTROL

Professional management of your robotic mowers.

5

FURTHER OPPORTUNITIES

Save time and money in the long run.

THIS IS HUSQVARNA FLEET SERVICES™

MAKING YOUR WORKDAY EASIER

INVENTORY CONTROL

ALL YOUR EQUIPMENT IN ONE PLACE

Don't rely on paperwork. With Husqvarna Fleet Services™, you just check the inventory list, and you know exactly how many machines you have of each type. Give them unique names, and you can easily tell which is which. It's possible to add sensors to all kinds of equipment, including machines from other manufacturers.

Tagging allows machines to be categorized for different purposes. For example they can be assigned to specific locations or teams, making everyday operations much easier and faster to manage.

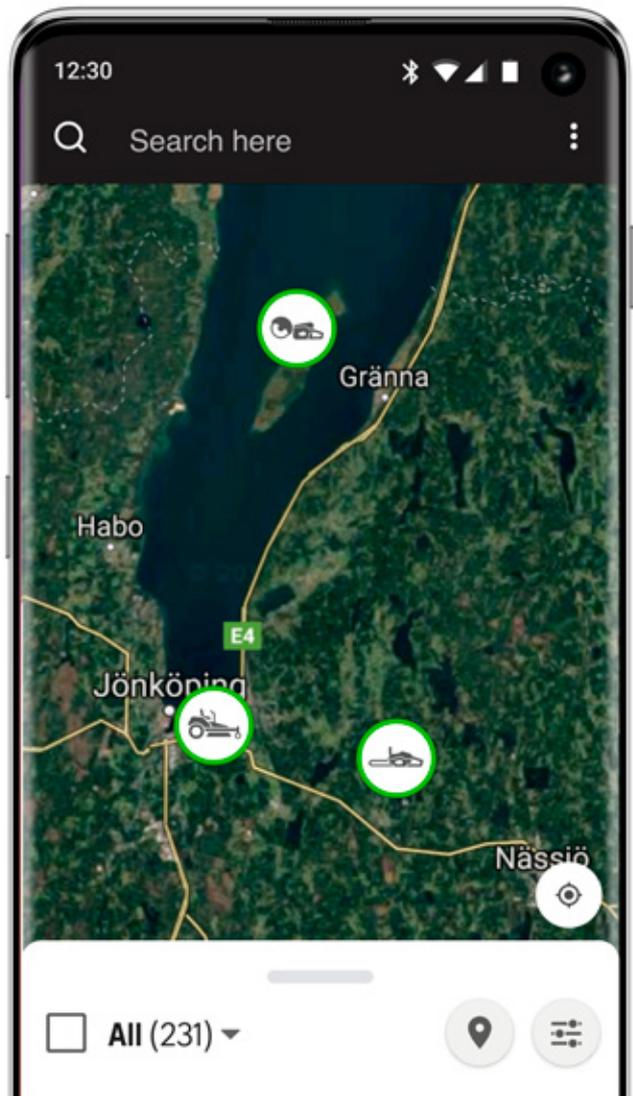

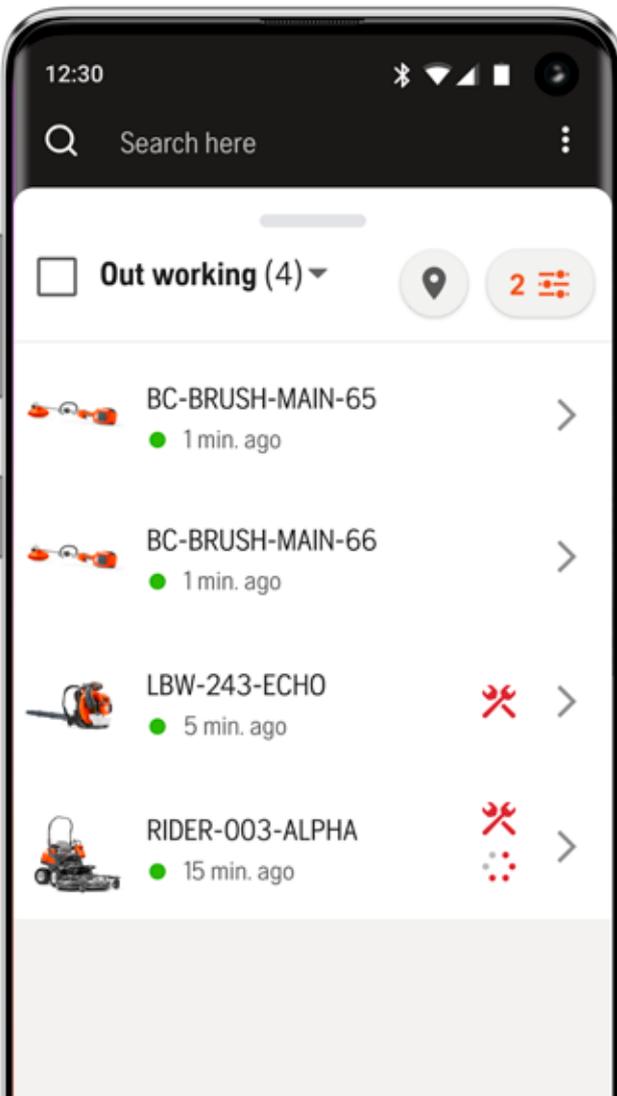

MACHINE LOCATION

FIND THEM ALL ON THE MAP

Always keep track of where your equipment is. As soon as a machine with a sensor is within Bluetooth® range from the app, its location is registered. So whenever you're looking for a machine, you just check the map to find out if it's in the storage, away for service or out working.

The tag feature makes it possible to have grouped machines performing specific tasks within pre-set geographic locations. This is particularly beneficial when using our robotic mowers with built-in GPS technology, allowing you a real time view of your operations.

AUTOMOWER® CONTROL AND DIAGNOSTICS

THE PROFESSIONAL WAY TO MANAGE YOUR ROBOTIC MOWERS

Husqvarna Fleet Services™ lets you start, stop, change cutting height, or adjust schedule – for one or several mowers at a time – from wherever you are. You can follow them on the map in real time. Should an error occur, you'll be notified immediately. These insights allow you to make improvements to ensure a smooth, efficient operation.

MACHINE STATISTICS

SEE WHEN AND HOW MUCH YOU'VE USED IT

Since the sensors track the engine hours of every machine, you can easily get an overview of your operations. You can produce a workday log with detailed information on how many hours they have been used every day.

INTEGRATED CONNECTIVITY

STAY CONNECTED TO YOUR FLEET

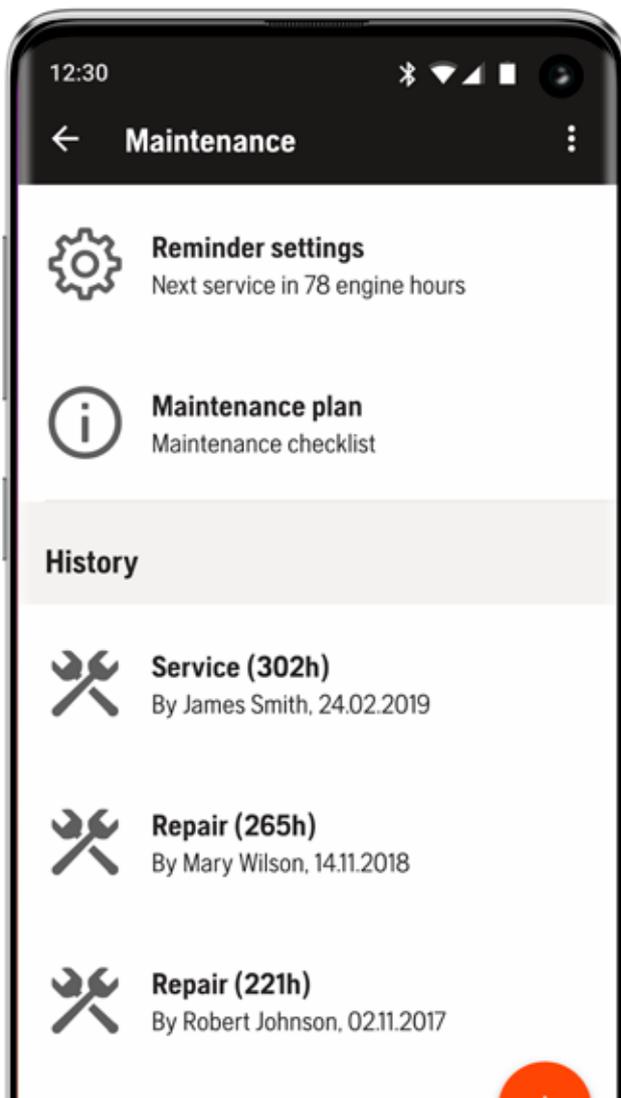

Many of Husqvarna's products have integrated connectivity thanks to built-in Bluetooth®. This makes connecting them to Fleet Services™ even easier. You get all the benefits from the fleet management system – operational insights and operation log – directly from the product and and you can also update also update firmware directly from your app. Built-in Bluetooth® also means that your product is future-proof and ready for any product updates.

SERVICE OVERVIEW

SERVICE HISTORY AND NOTIFICATIONS

By using Husqvarna Fleet Services™, you always have access to the service history for each piece of equipment. This makes it much easier to keep track of status and troubleshoot in the event of a breakdown. You can also get service reminders based on actual engine hours or calendar time, to make sure your equipment is always in great shape.

FURTHER OPPORTUNITIES

VITAL ASSISTANCE TO DEVELOP YOUR BUSINESS

Sit down. Have a coffee. Open your laptop. When the dust has settled – or when one season has come to an end and you start planning for the next – that's when the fun begins. Because the data you've collected will give you valuable insights on how you can start saving a lot of time and money, to develop your business even further.

MACHINES AND INVENTORY

Your total fleet of equipment, at a glance.

CARBON FOOTPRINT CALCULATOR

Your total CO₂ emissions in kilograms, and which types of machines they come from.

MACHINE USAGE

How many of your machines you use each day, and how often you use them.

ENGINE HOURS

The average engine hours per day for each machine family during a selected time interval.

Invest in the equipment you need, not the equipment you think you need.

Base your purchases on facts. Look at the machine usage report and you can tell exactly how many of your machines you actually use – you might be able to do the same job with fewer of them. Furthermore, since you know the engine hours of each piece of equipment, you can easily identify the ones that will last another season.

Save time and money with preventive maintenance.

If you own ride-on mowers, you probably know the value of preventive maintenance for avoiding costly downtime and repairs, as well as for allowing your equipment to last longer. With Husqvarna Fleet Services™, you can set up a maintenance strategy for each machine group. Allowing you to get reminders based on recommended service intervals for all types of equipment, efficiently minimizing the risk of breakdowns.

Get a handy tool for reducing CO₂ emissions.

Whether you work for a municipality or a commercial contractor, reducing CO₂ emissions is an important target. The Carbon Footprint Calculator provides you with the data and insights you need to take action – and of course, to report your progress to your stakeholders.

Spend less time managing your equipment.

Husqvarna Fleet Services™ keeps an eye on your equipment for you. Weekly reports and messages will alert you if there's anything you need to deal with. This saves time. And as you know, time is money.

Find ideas on how to increase productivity.

For some businesses, productivity is quite simple: The more you run your equipment each day, the more you get done. Some, for example, have dedicated teams who spend their entire day with a brushcutter or a forestry clearing saw in their hand. By looking into the daily runtime of each machine, you'll be able to identify time thieves that get in their way, and get more done.
