PRESENTING THE 572 XP® AND 565 CHAINSAWS

PROVEN ENDURANCE AND PRODUCTIVITY
The new Husqvarna 572 XP® and 565 chainsaws: designed from scratch to be tough enough for even the most demanding job: stronger, lighter and more manoeuvrable. With their outstanding cutting performance, excellent cooling capacity and state-of-the-art filtration they’re built for maximised productivity, reliability and durability, day after day. Husqvarna user-friendly design and low vibrations lay the foundations for a long and healthy working life. So, the next time you pack your gear, pack the new Husqvarna 572 XP® and 565 chainsaws.
COUNTLESS INNOVATIONS.
THE NEXT LEGENDARY CHAINSAW.
OPTIMISED FOR PRODUCTIVITY, RELIABILITY AND DURABILITY, DAY AFTER DAY.

**12% HIGHER CUTTING CAPACITY**
New engine design offers a wide usable RPM range for peak performance even under heavy loads. 12% higher cutting capacity (compared to previous models in the same cc range) makes the 572 XP® ideal for productive operation – even when using long guide bars.

**NEW X-CUT CHAIN C85**
Sharp from start provides for superior cutting capacity.

**EXCELLENT POWER TO WEIGHT RATIO**
Weighing just 6.6 kg and with its powerful 4.3 kW engine, the 572 XP® has a better power-to-weight ratio than any Husqvarna saw with similar displacement.
EXCELLENT COOLING CAPACITY FOR A LONGER ENGINE LIFE

Our new cooling system is optimised in every detail to give you a reliable chainsaw for any situation.

THE 572 XP® IS EQUIPPED WITH NEW STATE-OF-THE-ART FILTRATION SYSTEM

572 XP® carries – as standard – a large surface heavy duty filter for longer and better filtration. The filter has a larger filtration area compared to previous generation. Providing a chainsaw with a healthier engine optimised for long working hours.

10 TIMES QUICKER AIR/FUEL MIX ADJUSTMENT

AutoTune™ ensures a correctly tuned engine setting and optimised engine performance in all conditions.

TESTED TO PERFECTION

EVEN MORE FEATURES AND BENEFITS THAT MAKE EVERY WORKDAY EASIER AND MORE PRODUCTIVE

LOW VIBRATIONS
Husqvarna's anti vibration system separates efficiently your hands from the vibrations generated by the engine and the cutting equipment. This is to protect your body but also to reduce the fatigue in your arms and hands and in the end of the day contribute to make your workday more productive.

FLIP UP FUEL CAP
Easy to open and secure firmly, even when wearing thick winter gloves.

BETTER CHIP EJECTION AVOIDS CLOGGING
The new clutch cover is designed to optimise rapid, safe saw chip ejection. Prevents clogging, even when cutting long fibre wood.

SOFT CUT OUT SYSTEM
Our new innovative system for engine control is designed for providing a long engine life. The system monitors the engine and assures that the engine always is protected from over revving.

BETTER MANOEUVRABILITY GIVES FULL CONTROL
The front handle bar position is 10 mm closer to the center of gravity, giving you better cutting control.

HEATED HANDLES KEEP YOU PRODUCTIVE
Keeps your hands warm for improved comfort and productivity. Maintaining manoeuvrability and control at the highest level also increases safety.

A FELLING SIGHT TO LAST A LIFETIME
Perfect sight is critical when felling – so we made one that will outlast the chainsaw itself.

RUBBER HANDLE INLAY FOR SAFER GRIP
The rubber handle provides a firm grip, while still allowing you flexibility while you work. Only on the 572 XP.

TRANSPARENT FUEL LEVEL INDICATOR
For safety reasons, you should always check fuel levels before starting work. Now it is easier than ever.

AIR INJECTION™ FILTERS 98 % OF INCOMING DUST
Give you full working days with maintained performance and less wear on the engine.
HIGHLIGHTS FROM HUSQVARNA’S WORLD-WIDE TESTING

“WORKING TOUGH”
CANADA, BRITISH COLUMBIA, KOOTENAY RIVER

In Canada, heavy duty logging takes place at different altitudes in a humid atmosphere and variable temperatures. This climate affects every chainsaw, and our test really shows the advantages of new generation AutoTune™. This updated component helps the engine adapt quickly to the surrounding conditions, making a strong contribution to a productive working day.

“It has more chain speed and it’s big enough to easily handle wood up to 5 feet thick.”

GEORGE PEZDERIC
LOGGER

“TRAVERSING THE TREETOPS”
USA, MASSACHUSETTS, HOLLISTON

A professional operator in the tree care industry requires a chainsaw in compact and user oriented design. Our test was done by professional tree care specialists, who experienced the impressive power and slimmed design of the 572 XP® which is highly appreciated in their daily work. Easy starting also contributed to fast and smooth work all day long, high up and low down in the trees.

“The 572 is pretty amazing. It’s very easy to handle. Ergonomically it positions itself really well.”

ED CARPENTER
ARBORIST

“It’s reliable. The anti-vibration is great!”

WARREN ESSER
LOGGER
HIGHLIGHTS FROM HUSQVARNA’S WORLD-WIDE TESTING

“DEFEATING DUST MUD”
AUSTRALIA, NEW SOUTH WALES, BULAHDELAH

At this Australian saw mill, the 572 XP® chainsaw is exposed to a lot of dust in the air plus an impressively tough work load. High RPM and continuous restarts is the usual way of working. Excellent cooling capacity, the large felt filter and the improved saw chip ejection are just some of the things at which we took a closer look.

KIAH MARTIN
PROFESSIONAL ARBORIST

“What a power! Nice handling, feels very well balanced and it’s not as heavy as I thought. Ergonomics is great, it just fits with the body.”

NEIL ONLEY
LOGGER & SAWMILL OPERATOR

“The chainsaw we use for cutting logs off, for docking and occasional log falling – it has to be reliable and it has to be up to the job.”

“BEATING THE HEAT”
SOUTH AFRICA, DRAKENSBERG, FARM №7 CASTLE ROCK

Around 60 trees a day, limbed and bucked, is the average harvest for loggers working in this South African plantation. Working days are hot and long, and really put the excellent cooling system to the test in an extreme environment. With AutoTune™ and the connected engine diagnostic tool, the performance of the 572 XP® is clearly visualized on a computer, optimizing work and allowing greater productivity.

MSIZI NDABA
LOGGER

“The unit is powerful. It makes my work a lot easier and I am able to finish my work sooner. To start the saw is also easy.”
In the heart of the European Alps, our chainsaws were tested by loggers working in both forest conservation and the prevention of avalanches and falling rocks. Trees in the area grow on steep slopes close to the tree line. The improved power to weight ratio and slim design, in combination with the engines' wide range of optimal RPM, simplifies operations in this extreme environment.

In remote working places, reliable starting is key. Siberia could hardly be any more remote – or any colder. Our test logger works long days and especially appreciates good starting ability and ergonomic factors such as low vibrations, heated handles and the ability to perform basic maintenance with gloves on.

“It’s very agile. It’s very compact. Everything is close together.”

URS AMSTUTZ  
LOGGER

“To me, the most important thing is the weight – and the power!”

PHILIPP AMSTUTZ  
LOGGER

“It is always good to work with good equipment. I really love working with Husqvarna equipment.”

DIMA  
LOGGER

At just 6.6 kg with a powerful 4.3 kW engine, the 572 XP® has a better power-to-weight ratio than any Husqvarna saw with similar displacement, and 12% higher cutting capacity than previous equivalent models. Excellent cooling and heavy-duty filtration mean great performance, while smart design and easy operation keep productivity high even with long guide bars. With AutoTune™, Air Injection™ and low vibration, it’s built to deliver all day long.

70.6 cm³, 4.3 kW, rec. bar length 38-70 cm, 6.6 kg (excl. cutting equipment)

With outstanding cutting performance, the 565 will help you work faster even with long guide bars. Excellent cooling capacity and state-of-the-art filtration means great performance and easy operation even for the toughest jobs. Equipped with AutoTune™ and Air Injection™ and with low vibration levels, the 565 is a powerful yet ergonomically designed chainsaw for fast, safe work.

70.6 cm³, 3.7 kW, rec. bar length 38-70 cm, 6.5 kg (excl. cutting equipment)

*Equivalent sound pressure level, according to ISO 22868, is calculated as the time-weighted energy total for different sound pressure levels under various working conditions. Typical statistical dispersion for equivalent sound pressure level is a standard deviation of 1 dB(A).

**Noise emissions in the environment measured as sound power (LWA) in conformity with EC directive 2000/14/EC. The guaranteed sound power level includes variation in production as well as variation from the test code with 1–3 dB(A).

***Equivalent vibration level, according to ISO 22867, is calculated as the time-weighted energy total for vibration levels under various working conditions. Reported data for equivalent vibration level has a typical statistical dispersion (standard deviation) of 1 m/s².
MINIMUM DOWN TIME. MAXIMUM RESULTS.

THE NEW X-CUT CHAIN AND X-FORCE BAR.

SHARPNESS THAT LASTS
MORE RUN TIME, LESS MAINTENANCE

LOW STRETCH
LESS ADJUSTMENTS, LESS RISK OF DAMAGE

HIGH CUTTING EFFICIENCY
BETTER RESULTS AND EASIER WORK

GOLDEN TIESTRAP
EASY TO FIND THE RIGHT DIRECTION

X-CUT C85 SAW CHAIN
The highly anticipated X-Cut chain for professionals is finally here. Developed, designed and manufactured using the most advanced technologies and rigorous quality control. With a long-lasting sharpness, an outstanding durability and high cutting efficiency, it is made for minimum down time and maximum results.

X-FORCE 3/8” LAMINATED BAR
Updated with a new profile, a larger nose with an 11-tooth sprocket, six rivets and a sealed bearing system to improve durability and reduce maintenance. Cutouts in the centre plate reduce the weight of the bar without compromising rigidity or performance.
